

## Inspiring Interactions for BME educators

FREE professional development course for supplementary school leaders

New training course for all supplementary school leaders, aiming to work alongside mainstream teachers to **address the underachievement of BME primary students in Bristol** through:

- **a free 3-day professional development course in January 2011** for leaders and teachers to increase their skills and confidence in delivering inspiring, accessible science lessons
- **supporting supplementary school leaders in their teaching and offering accredited training towards professional qualifications** in partnership with the School of Education, UWE.
- **addressing mainstream teachers' 'cultural competence' in teaching and relating to BME students**
- **an activity day in April 2011 held in At-Bristol for course participants and their students (and their parents and carers)** to allow all participants to put into practice what has been learned during the course.

All supplementary schools are encouraged to get involved! For further information on this fantastic opportunity, and to register your interest in the course, please contact

**Chris O'Callaghan, 0117 9157 175, [chris.ocallaghan@at-bristol.org.uk](mailto:chris.ocallaghan@at-bristol.org.uk)**

Alternatively, you can write to the project manager at:

Chris O'Callaghan, At-Bristol, Anchor Road, Harbourside, Bristol, BS1 5DB.
